PROSPECTIVE MEMBER INFORMATION

Applicants must attend two official WMC activities other than socials. Activities are listed in THE RAMBLER which is the official publication of the Wasatch Mountain Club, published by and for its members. Prospective members may receive THE RAMBLER for two months by writing the Membership Director at the above address and enclosing a check for $5.00 payable to the WMC. If you have internet access, the Rambler is accessible at http://www.digitalpla.net/~wmc. Also, you may receive, on a trial basis only, an electronic version of the Rambler activities by email. To receive this, send an email message requesting an email version of the Rambler, to janzenrg@inquo.net. This will come as an email attachment in Microsoft Word format. (There is a $10.00 charge for returned checks.) An application form may be found in the center of THE RAMBLER. Ask the activity trip organizer to sign your form after completing the activity.

MEMBERS: If you have moved, please call the WMC office or send your new address to the Membership Director. Allow 45 days for address changes. If you did not receive your RAMBLER, contact the Membership Director to make sure the WMC has your correct address. Replacement copies are available, while they last, at the WMC office during office hours.

TO SUBMIT AN ARTICLE or PHOTOGRAPH: Articles should be on 3.5" diskette, MS/DOS format, and preferably in Microsoft Word or WordPerfect form. Label the diskette with your name and identify what file(s) are submissions. Enclose a hard copy in case your diskette cannot be read. Mail submissions to Publication Director at the office address, or hand deliver them to the WMC office. Leave hand deliveries in the Blue box outside the door. The deadline is 6:00 PM on the 15th of the month. Also, you may email submissions to janzenrg@inquo.net. Include the submission as an attachment or as the text of the message. Preferably as an attachment with proper formatting (i.e. Arial font, 10 point for most submissions) Photos of all kinds, B&W and color prints, and slides will be accepted. Make sure that the photo is labeled with the photographer, date, and names of people. Unless a stamped, self-addressed envelope is provided, returned submissions will be available in the Red box outside.

Cover Photo: John Lorang at the head of Round Valley Draw, a tributary of Hackberry Canyon. This was a fun little side trip (5/25/98), complete with chimneying, tree climbing, and bouldering. At places, the canyon's undulations narrowed to 18".

ROADIES AND TREAD HEADS
I Need YOU to lead rides! If you want casual rides in the country, all out training rides, rides in the mud, scenic vistas, etc. – then YOU must pedal forward and help lead those rides. Even if you are going out of town to ride somewhere – call and list the ride – you might get others to go! Don’t be shy. Leadership has its benefits. Call me and I’ll help schedule an activity.

An elevation gain of almost 3,000' means this is a steep trail (939 feet/mi gain). But it will be worth the effort, thanks to these fun-filled organizers and the views from the summit. Bring: 10E's and carpool$. Meet before 9:00 am at Skyline High. The trip leaves promptly at 9:00 am. Trip costs include the Millcreek access fee.

High point is 11,051, with 1,651' elevation gain. This is probably the easiest 11,000+ peak to reach in the Wasatch, and Jim would like to give everyone a chance to climb it. Bring: 10E's (hiking boots are required), and carpool$$. Meet by 9:00 am at the Little Cottonwood Park & Ride.

AUG 8 SAT

HIKE: RED-WHITE-RED-WHITE RIDGE SCRAMBLE (MSD) Jan Brain (435-649-8636) explains this hike: Hike to Red Pine Lake, scramble to WHITE Baldy Peak (11,321). Continue along the exposed ridge to RED Baldy Peak, and then scoot down to WHITE Pine Lake. It's a loop trip that begins and ends at the WHITE Pine trailhead. To get you even more dizzy, the WHITE pine here doesn't even refer to a pine, it's the Engelmann spruce. Get it? Got it! At any rate, plan on a long day of scrambling and exposure. Bring extra food and water with your 10E's, and carpool$$. This is in the Lone Peak Wilderness Area, so trip size is limited. Call early to register.

At any rate, she will begin hiking at the Mill D trail, and it will be a NTD. Bring: 10E's and carpool$$. Meet by 9:30 am at the Big Cottonwood Park & Ride.

AUG 9 SUN
HIKE: DEVILS CASTLE (MOD 6.1/Scrambling) Don't be fooled by the MOD rating! Mike Berry (583-4721) is taking on a challenging peak, noteworthy for the exposed scrambling route up it's knife-blade summit ridges. It's only a MOD because of it's easy access, being just above Cecret Lake at Alta (3.6 RT miles, 1,520' elevation gain). You should be in good physical shape for this hike, and have some confidence on exposed rock. The thrill of accomplishment when you finally reach the summit makes up for the earlier fear. If the group is willing, we will continue along the summit ridge and descend via the east saddle, making this a loop trip. Bring: an extra dose of sure-footedness, 10E's, and...
carpool$$$. Meet by 9:00 am at the Little Cottonwood Park & Ride. If you have any questions about your ability and the skills required for this hike, call Mike beforehand to discuss them.

This is the highest peak in the Wasatch Range, and involves over 5,500' of elevation gain. Plan on a long day, with scrambling, exposure, and boulders. Bring: 10E's, plenty of extra food and water, and other essentials. This is in the Mt. Nebo Wilderness area, so trip size is limited. Call early to register.

Some bristlecone pine trees are thought to be 5,000 years old, the world's oldest living things. Plus, this is the only permanent icefield in the Great Basin, so this weekend should really be great. Randy will be returning to SLC Saturday, ending the official part of the trip. Individuals may stay over Saturday night on their own. Children are welcome. Plan on one or two fish dinners of some of the freshest fish you've ever eaten. You will need your own fishing gear and a license. There are 60+ fishable lakes on Boulder Mountain, in a beautiful alpine setting. Fish include brook, rainbow, and maybe some others. You don't have to be an expert to come. If you're a beginner, we'll help you improve. Spots will be reserved for the first 14 people who call, after which a waiting list will be started. High clearance or 4WD vehicles are NOT required, but a plus to get to out of the way fishin' holes. HIKE: MEDITATION HIKE IN LITTLE COTTONWOOD (NTD-MOD) The ultimate destination for Tony Barron (272-8927) is Church Fork Peak, which is a MOD. However, Tony wants to do a little trail maintenance along the way, as this trail is quite overgrown in spots. Since we don't have any official NTD hikes scheduled today, if you don't think you can make it all the way to the Summit, an NTD'er could do this hike and clip along the way to slow their pace. Bring: 10E's, $ for the Millcreek access fee, and brush clippers as an excuse to not summit. Meet by 9:00 am at Skyline High.

SEP 05 SAT
HIKE: MILL CANYON PEAK EXPLORATORY (AM FORK) (MOD/Adolescents) Randy Long (943-0244) says accompanied adolescent children are OK (sorry, no little tykes on this one) as he does an exploratory for wilderness documentation. Randy says he was here last year on his own, and it's a great area, so he wants to share it with the club. A totally new wilderness area is being looked at for this area (North & East of Timp, West of Wasatch Mtn. State Park). Bring: 10E's (he emphasizes food, water, and rain gear) and $ for both carpooling and the American Fork Access fee. Meet by 9:30 am at the Draper Park & Ride (I-15 and 123rd S. next to the Flying J)

HIKE: PORTERS FORK DOGGIE HIKE (MT. RAYMOND OPTIONAL) (MOD) Steven C. Carr (261-5787) invites well behaved dogs and shade-seeking humans on this hike up Porter Fork in Millcreek Canyon to the saddle below Mt. Raymond. The route follows the gated paved road up lower Porter Fork until the cabins end. From there, it is an old unmaintained mining road that passes thru massive avalanche debris. It meets the Desolation trail, and then continues to the saddle. Testosterone-burdened individuals (TBI) can ascend the steep slippery weeds to Mt. Raymond, while the rest of us enjoy a good lunch party at the saddle. Call if you have any questions. Bring: 10E's and $$ for your driver, as well as the Millcreek access fee. SEP 06 SUN
HIKE: GRANDVIEW PEAK (MOD) Jerry Hatch (583-8047) tries to get to this tough-to-reach peak once a year. It's tough only because the access is long. You start hiking from Rotary Park, at the top of City Creek Canyon. Jerry will hopefully get some vehicle permits, enabling us to drive, not walk, the 5 miles up City Creek to the starting point. This hike is not on trail, but is pretty straightforward. If you're not sure which peak is Grandview, you've probably all seen it from any of the Wasatch peaks as you look North--it has a distinctive...

**BOATING: WESTWATER CANYON**

Westwater Canyon was one of the last stretches of the Colorado River to be boated. Dubbed "Hades Canyon" by an 1889 railway survey expedition down the Colorado due to its rough water, it wasn't run until 1918, when river explorers Ellsworth Kolb and Bert Loper shot through Westwater in a small wooden boat (brave/crazy guys!). In the tight, constricted canyon, Vishnu Schist (the same ancient black rocks found in the Grand Canyon) and other geologic wonders provide modern-day river runners with excellent scenery to accompany the sometimes-wild ride through the numerous Class III-IV Westwater Canyon has to offer. Join Trip Organizer Craig McCarthy (424-2376) for a weekend adventure to this haven for weekend boaters from Colorado and Utah. We will do a one-day run of this famous 17-mile stretch of river, driving down to the put-in Saturday morning, and returning to Salt Lake City on Sunday evening. He will do several of the “smaller” non-technical mountains, and end the trip with a final 18,000’ to 20,000’ technical mountaineering trip. If you are not into technical mountaineering but still want to come along, you can still do all the preliminary hikes, and then pack to the basecamp of the final peak. If you can get the low airfares, the trip may run as low as $1,000.00. As of this writing in July, the air fare is as low as $750 RT from SLC, but who knows how long this fare will last. Call Scott NOW if you are interested in this Christmas adventure.

A great thanks to all who joined us on the Club's Service weekend. We replaced some window glass, removed all the winter shutters, cleaned the cupboards and refrigerators, cut and split some wood, cleaned up the grounds, painted most of the bed frames, and hung wall paper on the upstairs walls. Special thanks to Barbara Green for her donation of the wall paper and expertise in hanging it. It really makes the upstairs look great. Also special thanks to Leslie Woods for her donation of a Microwave. That will come in handy at the potluck parties. Mary Lines has also donated some carpet for the caretaker's room. I want to express my appreciation to the following persons who attended the July work party: Barbara Green, Christene Allred, Judy Butler, Paul Zuckerman, Ken Engstrom, Harry Kimbrough, Ursula Jochmann, Josiana Jochmann, Carrie Morrison, Valerie Hahn, Brad Yates, Cheryl Krusko, Curtis Camp, Linda Koskey, Bill Hughes, and Carrie Hughes.

Our work party in August will be a multi-day activity. We are planning to refinish the floors. We plan to start Friday evening August 28th at 6 PM to sand the floors. We will rent two big belt sanders and an edge sander to sand the floors that evening. We will need to sweep the floors and move all the furniture out or move it as we go. On Saturday morning we will clean the area and apply the first coat of Varathane. Sunday evening we will sand the first coat and apply a second coat. Monday evening we will sand the second coat and apply a third coat. If anyone has a sander or expertise in this area, please let us know. We will need lots of help on this project. Please call Bill Hughes 523-0790 or Julie Jones 278-4753 to let us know when and how you can help. We can't do this one without you!!!!

We are still working on the water and plans for the bathroom addition. Hopefully we will have more news to report in the September Rambler. Thanks again for all your help and don't forget to come enjoy the Lodge activities this summer.

August 28 Lodge Work Party  Meet at the Lodge at 6:00 PM  Our project this weekend will be to finish the floors in the Lodge. We will sand the main and upper level floors this Friday evening. We will need help moving the furniture, cleaning the floors and operating the sanders. We will rent 2 big belt sanders and 1 edge sander. Please call to let us know if you can help. BOATING
Vera - Boating Director

HELP!!! - Our shed need some TLC. Out with the old and in with the new. We need to rearrange the shelving to make room for the newest boats in our fleet - the duckies. Also, there is a lot of maintenance that needs to be done, some of which never happened in the spring due to rained out work parties. PLEASE HELP. We need lots of muscle power on this day. We’ll start at 8:00 am to beat the heat. Please call Marilyn, 273-0369 so she knows how many worker be’s she can count on – or just show up for a while to help. THIS IS A CALL TO ACTION!

DUCKIES - We now have 4 inflatable kayaks for rent. (2 Aire Lynx I and 2 Lynx II). They rent for $20 for WMC/ $25 non WMC trip per day. Same rate for the single person or two person. Helmet and Werner TAP paddles are now available. Life jackets are available as always or $3 per person per day. Call Marilyn, 273-0369 and give her plenty of warning.

Our policy is as follows: Inflatable Kayaks can be rented as a trip boat on Class I-II level rivers only. On Class III+, they can be rented by individuals (at the WMC rate) who will be screened based on ability just like any other kayaker.

Duckies can be a lot of fun, but they can also tempt an inexperienced boater into bigger waves than they are able to handle. This can be dangerous to the boater and makes it a burden for the kayakers, who are pressed into rescue service. Be honest with yourself, assess your skills and don’t take the duckies into water you can’t handle. Help us keep the program safe. Wear a helmet, use the buddy system and respect the forces of the river.

EQUIPMENT COORDINATOR - Due to the popularity of our program, this has grown into a large responsibility. Are there any gear-heads out there who are interested in helping out? We may split the job in two parts - one for gear maintenance and another for gear rental. Interested parties, please call Vera. 292-8332.

August 1998
From the Hiking Director
By Cheryl Soshnik

Howdy, hikers!

The season’s in full swing, and the hikes are rockin’ and rollin’. I only have ONE more batch of hikes to put together to end the season, so if you’ve been a wanting to organize a hike in 1998, you’d better call me! Hope you’ve been enjoying the variety we’ve been providing you.

A little feedback on the 10E’s: More people have suggested “essential” emergency items to carry in your day pack. The latest: DUCT TAPE AND BAILING WIRE. I guess. Well, to remind you, I’ll be publishing the “official” 10E’s each month until the end of the hiking season. Here they go:

THE 10 ESSENTIALS:
You may decide to carry more than this, but 10 emergency items that you should always carry with you in the backcountry are:
1) Map and Compass
2) Flashlight with spare bulb and batteries
3) Emergency food and extra water (or water purification pills)
4) Extra clothes (including rain gear)
5) First aid supplies
6) Matches in waterproof container
7) Fire starter (candle or commercial)
8) Pocket knife
9) Sunglasses (and Sunscreen)
10) Space blanket and/or large garbage bag (orange is best for visibility)

Membership Director’s Message
By Carol Coulter

Membership renewal dates are now right at your fingertips!
With the new database and computer capabilities we now have, we are able to provide you with more information to keep your membership running smoothly. A big advance is the addition of your renewal date on the Rambler mailing label. Check it out! You’ll see that right beside your name/address is a date such as “10/98.” This date is your membership renewal month and year (much as in other magazine publications). Now you won’t have any trouble tracking your membership and realizing when it is due.

Of course, as always, we will continue to send out membership renewal forms at the end of the month prior to your renewal month. Our packets include the renewal application form (to be completed, signed, and initialed by each member), your membership card(s), and a return envelope. Renewals are due upon receipt.
If you fall behind more than two months, you will need to reinstate your membership and pay a $5 reinstatement fee in addition to the dues. So please stay current and you won’t miss a *Rambler* or have to pay a reinstatement fee. Any questions, please contact the membership committee at 463-9842, extension 1.

**Other thank you’s......**

Clarence Bertino has almost single-handedly handled the club’s voicemail for the past two years. He has also kept up a large portion of the correspondence for the Club over this period of time. We owe Clarence a big thanks for his hard work and attentiveness to member needs.

Also Martin Clemens has helped tremendously with the membership committee over the past year. Thank you, Martin.

Carol Ann Langford has recently volunteered to help. We picked up on her southern charm quickly and put her on the phones—giving Clarence a well-deserved rest! We figure membership will increase significantly with Carol Ann “sweet talking” prospective members.

Thanks also to Randy Long for managing the Adopt-A-Highway activities. Randy is coordinating three clean-ups this year, and we really appreciate his effort.

Trip Talks

DESOLATION DABBING: RAFTING THE GREEN RIVER:

Desolation and Gray Canyons

June 13-17, 1998

by Rob Jones

with a poem by Jeanine Kuhn

Prologue: We started at Sand Wash, SE of Myton, Utah and got off the river below Swaseys Rapid, which is 12 river miles upstream from Green River, Utah. This 83-mile stretch (River miles 95 to 12) is Class 1-3+ water. Because of work schedules, we floated the Deso/Gray in 4 days, made possible by the relatively high stream flow. The trip would probably be better, offer more hiking, etc., at about 5-6 days, and this amount of time would be required in low water. If you go, first check the USGS streamflow web site. Note that the

Near the river, life is much busier. The BLM says that the Desolation/Gray section of the Green is the least-impacted section of this river system since Powell. And, we would relish in the relative solitude, finding it far from drab. For this section, the Green River lazily curls out of the Uinta Basin and enters the Tavaputs Plateau, dissecting the plateau into east-west segments. However, the BLM (Bureau of Leasing and Mining) has participated in the numerous oil pumps on the plateau and there are excavation holes near Sand Wash to remind us what may happen if mining oil sands becomes profitable...

Access: To reach the put-in at Sand Wash, one turns South off Highway US-40 (west of Myton, UT) between Mileposts 104 and 105. It’s 47 miles of dirt and pointy rocks to the river. The take-out is below Swaseys Rapid which can be reached by traveling to the east edge of the town of Green river, across the bridge over the Green, and, 2 mile east of the river bridge, turn left (North) at the first paved road (Hastings Road). It is paved for about 6 miles, and 4 more miles of gravel

Green River gauge, at the town of Green River, is downstream from a diversion dam that is just below where you take-out of the river. Also, note that the flow is partially controlled by the Flaming Gorge Dam, over 100 river miles upstream.

The USGS stream flow web address is:

Powell and crew were the first recorded people to boat this section, in June of 1869. Powell named the Desolation/Gray with the description from his river journals:

The canyon is very tortuous, the river very rapid, and many lateral canyons enter on either side. Crags and tower-shaped peaks are seen everywhere, and above them long lines of broken cliffs; beyond the cliffs are pine forests of which we obtain occasional glimpses as we look up through a vista of rocks. We are minded to call this the Canyon of Desolation.

leads you to Swaseys. You can continue another 12 or so miles on dirt to Nefertiti Rapid, access for day-runs from Nefertiti to Swaseys Rapids.

THE TRIP:

Day 1: Bug-in at Sand Wash: It was raining and the wind was blowing when we met at the Wasatch Mountain Club boat shack at 9 a.m. to complete loading the trailer and vehicles. Previously, teams had worked to prepare equipment and food, lots of food. With what looked like enough equipment to outfit the Spanish Armada, we began the drive to Sand Wash, put-in to the Desolation/Gray Canyon section of the Green River.

Dinner was an excellent combo of bratwurst, sauerkraut, potatoes, and rolls. Although offered copious quantities of wine, food, equipment, etc., Jim would not divulge the secret family recipe for the scrumptious sauerkraut. Because George and Kerry were late and had all the cooking equipment, we borrowed stuff from some Colorado boaters who were preparing to float. The wind continued throughout the night, and helped to ease the supply of mosquitoes. But, many of us dreamed, with trepidation, about rowing/paddling against the up-canyon winds for the first 26 river miles (RM).

Day 2: Flatwater: (River mile 95 to 78; 17 miles). Today, we powered along the lazy flatwater section as the cliffs grew taller and more interesting. The first 26 miles of this trip are flatwater. It was intermittently windy, and the temperature was mostly warm. We got an early, by river time, (9 a.m.) start, and this helped us avoid some of the afternoon up-canyon winds. Jeanine felt that the highlight for the day was an approximation of river time settling in, and the concomitant fading of some of the daily trivia. We all thanked lead-boaters George and Kerry for quitting a bit earlier than planned, thus avoiding the building up-canyon breeze. Carol conducted the smooth maneuver, groover instruction after we appropriately set-up the portable toilet below a pot-hole arch during halftime in the NBA game. The mosquitoes were few and the spaghetti and salad plentiful as we played a unique washer-in-the-hole game akin to horsehoes. We enjoyed showers (from our sun-shower bags that had been warming on the oar boats all day) and the cooling, generally bug-free, evening breezes. Life is good.

Day 3: A Snapping Day: (RM 78 to 52; 26 miles). Today, I am in the paddle boat captained by Craig, the River King. It is a wetter approach to touring the Green, especially in the front position. After flatwatering around Peters Point, we entered the Jack Creek Rapids (RM 70), then rapids in snapping succession, Big Canyon, Firewater, Cedar Ridge, Flat Canyon, Fremont, Wild Horse, and the more difficult Steer Ridge and Surprise Rapids (RM 56), where rocks and hydraulic holes awaited. At times I found my head breaking the waves before the raft did. Captain Craig was quite efficient in coordinating the paddling efforts and reading river obstacles. Captain Maria took over and she also did a fine job, followed by some captaining by Ursula. My right arm and shoulder wore out, so Carol and I traded places. This produced some difficulties for the captains, because Carol had been compensating for the weak-side stroke of the captain with some special paddle strokes, and I was unaware of this. Paddlers in the two paddle rafts took turns mooing each other as we leap-frogged from potty stop to potty stop. It's amazing, when in the wilderness, the moon can be seen during the day.

We stopped at the delightfully clear perennial Rock Creek to filter water. Clear water, such a
enchanting alternative to the muddy brown of the Green.
(The river doesn’t acquire it’s green tinge until the
Labyrinth section...to learn where, see the A
Labyrinth
Canyon: Canoeing the Green River, 1993” trip report at:
To obtain a campsite and set-up camp, part of
the group continued down-river, hoping to camp within
hiking distance of the petroglyphs, historic cabins, and
such in Rock Creek. But, there was a party that refused
to share sprawled across 2 campsites below Rock
Creek, so we hiked to the cabins but that was all. This
was disappointing, because I love to look for petros and
piqos. The canyon is deeper here than the Grand
Canyon is at Bright Angel, 5000’ from the unseen top of
the Tavaputs Plateau to the river level.
Our delightful day continued as we searched
another two miles for a campsite, finding one near Snap
Canyon. George and Kerry found the campsite and they
and the Kerry team also cooked a delectable several-
course meal of fajitas, dutch oven pudding cake, etc.
They have a cookbook, photos, and such on the web at:
http://members.aol.com/utahrafter/cookbook.htm
We spread out to camp under the cottonwoods
along the seldomly-used bar, discovering a bonus
surprise of clear-flowing Snap Creeklet. The groover
was placed on the sand bar below the rapids, affording a
panoramic view of the wondrous canyon walls. The
rumble from the river rapids in our front yard added
some squirming to my dreams, for I am more a desert
than a river person.
Three Fords Rapid looked very challenging, but
we had great position at the head of the rapid and
grazed the hole as we powered the lateral as directed by
our captain. Setting-up far-right in the rapid and the
initial entry seemed to pass in slow-motion, then we
whooshed through on adrenaline. Yow and yikes! The
Amotley crew@ of the other paddle raft are looking more
coordinated in their efforts to negotiate the rapids as a
team, and the outcome is that no one has gone for an
unintentional swim. But, no one is swimming today, it’s
just too cool. Craig mentioned that because this is an
Adrop and pool@ river section, it is a good place to
practice river techniques. For me, it was too cool to
practice swimming.
George had managed to get the camp just below
Rabbit Valley Rapid, a popular location for commercial
trips. The wind and intermittent rains were with us as we
enjoyed some of the best salmon I have ever tasted,
cooked by Chef Roger. However, the massive gusts of
The Coal Creek Rapid (RM 26) contained
several rock surprises, and was the difficult rapid for the
day. The other rapids were mostly big standing waves,
and we got wet several times, but no one went for a
swim. An access road appeared at the top of Nefertiti
Rapid, marking the top of the day run from Nefertiti (RM
20) to Swaseys Rapid (RM12). I tried to get a photo of
http://www.srv.net/~iac/trips/rj_rpts.htm. Most of us laid
down in one of the pools of cascading splendid water
and relished the cooling rinse.

Day 4: Rain Rabbit: (RM 52 to 29; 23 miles).
Today, the geology would dramatically change as we
slipped and sloshed through a rapid about once a mile.
The pygmy forest-studded red cliffs of Desolation
changed into the Gray Canyon lower cliffs of bland
crests (gray, yellow, brown) dotted with more true
desert plants. The only sustained flatwater stretch was
near the geologic shift. Rain began as we passed
McPherson Ranch (owned by the Ute Tribe, as is most
of the river-left bank along the Deso/Gray) and continued
almost all night. Wire Fence and Three Fords Rapids
(RM 37) were the more difficult today (class 3+).
We enjoyed a brief respite during lunch just
above Three Fords Rapid. We had watched George and
Kerry maneuver for position between three rocks and a
hole, and we were preparing to leave when the storm
swept in, rolling gray mist upriver and into our lunch
zone. Additional clothes came out, and I was happy to
be wearing my farmer-Jones wetsuit. We cowered
behind a brushy windbreak until the leading edge of the
storm had ripped past. Then, we continued into the
drizzle.

wind added some grit to Ursula’s otherwise wonderful
cobbler. No partying tonight, because everyone
retreated to tents to escape the rain, which continues as
the light fades, wind buffets the tent, and I conclude the
day’s journal notes.

Day 5: Flushed Out: (RM 29 to 12; 17 miles).
It rained nearly all night, but mercifully stopped about
dawn. It was a gray, cool (morning temperatures were in
the 40’s) day, with the extra clothes out of the bag today.
Looking back up-canyon, we could see snow on the
plateau. The Desolation plateaus are obscured by
ponderous dark clouds. Burr.
Sterling and I debated the nature of the
penultimate groover call, is there such a thing? Carol
noted that the kayak group camped on Ute land across
the river spent an inordinate amount of time watching the
scenic groover, which had been situated for dramatic
effect on the far reach of the sand spit.
Nefertiti Rock, but I discovered that the best perspective
is while one is in the rapid.... The Price River lazes in
from the West bank (RM 18), adding a gray silt stripe
that endures for 2 a mile or more in the brown murk of
the Green River.
We stopped for lunch in view of Gunnison Butte,
the marker for the end of the canyon, where we sliced

August 1998
through the leading edge of the Book Cliffs to look at the open space of the desert country. These are the vertical stratified cliffs that look like a library of stacked books one sees when traveling UT-6 or I-70 near Green River, Utah. We were still under a gray umbrella of clouds, while fluffy floaters dotted the sky over the open country.

Another mile and we beached for the last time below Swaseys Rapid (RM12), flushed out from the rapid-strewn Deso/Gray, and began disassembling the rafts and toting mounds of equipment over the sands of the landing. It grew a bit warmer as we changed into our traveling clothes and headed for Ray’s Tavern in Green River, traditional celebration spot for wondrous tours of the Desolation/Gray...

Epilogue: A few days later, the river flow recording said that the river level was 20,000 CFS, significantly up from the 16,800 CFS when we started this journey.

Trip participants included: Kerry Amerman, Maria Fruin, Eileen Gidley, Ursula Jochmann, Rob Jones, Jeanine Kuhn, Kenton Knorr, Sterling Larson, Craig River King McCarthy (trip organizer), Carol Milliken, Russ Reed, Holly Rordame, Elroy Smith, Holly Smith, Leona Smith, Roger Upwall, Todd Washburn, George Yurich, and Jim Zondlo....

And, I will conclude with a poem about the trip by Jeanine Kuhn. She says it so much more elegantly.

The Motley Crew

A Desolation/Gray Canyon Poem

by Jeanine Kuhn

It was posted in the Rambler for everyone to see
And nineteen special people said “that’s the trip for me”.
A whitewater spectacular, communion with nature brief
Led by Craig McCarthy, our fearless, faithful chief.
We gathered at the boathouse, packed gear, and off we went
To the Green River at Sand Wash where the first night was spent.
We woke to shining waters and skies a perfect blue.
The boats were packed and readied, then outfitted with crew.
We started down the river, a motley crew at best
All ages, shapes and sizes, searching for peace and rest.
River time set in and no one knew a care
As we paddled with the current, experiences to share.
At night, we dined like kings and slept neath starry skies
The days were blessed with rapids and too many mosquitoes and flies.
Toward the ending of the trip, just to make us each give thanks.
For the blue skies, warm weather, and firm sandy banks.
We were confronted with thunderstorms and hail galore.
High winds brought chill, but didn’t keep us on shore.
Paddling to the take-out, our spirits remained high.
Everyone dined at Ray’s, then left with a sigh.
Feeling sad for the trip’s end, already missing each other.
But wait! River time never ends and let’s return for another
Raft River Mountains Car Camp, Friday and Saturday, June 26-27
By Randy Long

Where are the Raft River Mountains? Way out in a very remote section of northwest Utah. The nearest services are in the small town of Snowville – 35 miles away. The small hamlet of Strevell is not only closed up – it's completely gone. This is again “big country” in other words.

These mountains are also surrounded by bleak, featureless desert, with a few farms, but that's it.

The Raft river itself starts in an even more remote section of these mountains, flows north, and empties into the Snake River somewhere near Burley, Idaho, and therefore becomes Utah's only connection with the famous Columbia River.

One other interesting point is that the north slope of these mountains is administered by Sawtooth National Forest out of Burley, Idaho.

But these are real, lively mountains, all complete with dense forests, far flung views, tumbling creeks, even a big cliff or two thrown in, and of course, an equally spectacular campground aptly named Clear Creek.

So: Three of us met Friday evening, and again Saturday morning, and hike Rosevere Fork, and really enjoyed it. This was an NTD hike. I documented this area for possible wilderness designation last year, and it certainly qualifies for, and deserves that.

Applicant Agreement, Acknowledgment of Risk, and Release from Liability

VOLUNTARY PARTICIPATION: I acknowledge that my participation in any WMC activity is voluntary. No one is forcing me to participate.

ASSUMPTION OF RISK: I am aware that WMC activities involve risks, and could result in injury, illness, death, and damage or loss of property. These dangers include but are not limited to: the hazards of traveling in remote areas without medical services or care, the forces of nature, the inherent dangers involved in participation in sports, wilderness travel, and social activities, and the negligent actions of other persons or agencies. I understand that all activities should be considered "exploratory", with the possibility of unexpected conditions and route variations. The WMC is not, nor does it provide, a professional guiding service. In order to partake in the enjoyment and excitement of WMC activities, I am willing to accept the risk and uncertainty involved as being an integral part of the activity. I acknowledge this risk, and assume full responsibility for any and all risks of injury, illness, death, or damage and loss to my property.

I verify this statement by placing my initials here: _____________

PREPARATION: I understand that it is my responsibility to evaluate the difficulty of any activity I participate in, and decide whether I am prepared by having the experience, skill, knowledge, equipment, and the physical and emotional stamina to safely participate.

RELEASE OF LIABILITY AND PROMISE NOT TO SUE: I agree that I, my heirs, and personal or legal representatives hereby do release and hold harmless from all liability, and promise not to bring any suit or claim against, the Wasatch Mountain Club, its leaders, directors, agents or representatives for any injury, illness, death, or damage and loss to property resulting from my participation in any WMC activity even if they negligently caused the injury or damage.

LEGAL FEES: Should it become necessary for WMC, or someone on their behalf, to incur attorney's fees and costs to enforce this agreement, I agree to pay WMC reasonable costs and fees thereby expended, or for which liability is incurred.

INSURANCE: I certify that I have sufficient insurance to cover any bodily injury or property damage that I may incur while participating in any WMC activity. If I have no such insurance, I certify that I am capable of paying for all such expenses and liabilities.
