### Appalachian Mountain Club's Third Annual River Conservation Leadership School

Are you concerned about the rivers you paddle? Is the water not quite as clean as it used to be? Should that development be so close to the river? How can I protect the rivers I love? Learn to become a skilled river activist as you examine these and other current issues in river conservation and advocacy at AMC's Third Annual River Conservation Leadership School. Watershed science, advocacy, and river conservation leadership training make-up the core curriculum of this innovative program which combines classroom discussion, role-playing, and on-the-water learning. We'll use local streams as our teaching laboratory as we discuss issues with guest experts, role-play leadership techniques, and discover how to conserve the rivers we love. Leave RCLS with loads of ideas and confidence to tackle your local river and watershed problems.

Participants should have a strong desire to see rivers protected, and experience with a river conservation activity such as a cleanup. RCLS will be held from Friday, June 16 at 6:00 p.m. to Sunday, June 18 at 1:00 p.m. at the Pocono Environmental Education Center in the Delaware Water Gap National Recreation Area, close to the junction of Pennsylvania, New York, and New Jersey. Limited to 20. Fee (including instruction, lodging, and all meals): AMC members \$115; non-members \$125. For more information, please contact Peter Donahue, AMC River Conservation Advocate at 617/523-0655 x314; or online at [pdonahue@amcinfo.org](mailto:pdonahue@amcinfo.org).

*(This is not a Wasatch Mountain Club sponsored event.)*

## LEAVE NO TRACE:

### Obtaining Pure Water:

All water, except municipal tap water, must be suspected of containing diseases such as giardia (an extremely debilitating gastrointestinal disease that can be a lifetime affliction once contracted.) Giardia is caused by protozoans that are distributed in the feces of deer, beaver, humans, and other animals. These protozoans lie dormant in cold water in a cyst form until ingested by another mammal. The best ways to purify water are by boiling and by pumping through a specially designed micropore filter. Chlorine will usually not kill giardia. Iodine is not the best choice, but if it is your only alternative, the water should be heated to 70° F, and contact time must be a minimum of thirty minutes. Follow the instructions with the iodine kit. Boiling and the special pumps are the recommended methods.

## SO WHAT

Submitted by Martin McGregor

So what has been happening lately and for the last ten years on the subject of foothills/minor canyons trail access? Here's a partial update for the southern portion mixed with March madness.

**Tolcats Canyon** (Mount Olympus trail): A deal was cut with the landowner and a public parking place was constructed near the new trailhead at Pete's Rock. Salt Lake County scores a 2-pointer with an assist from the Forest Service.

**Heughes Canyon:** The canyon has been purchased by the Trust for Public Lands and was turned over to the forest Service. The private land at the mouth of the canyon *might* be purchased by Salt Lake County. Default public access is by parking on the street and walking up Berghalde Lane. Official parking and access is being pursued. The Trust for Public Land scores a 3-pointer.

**Dry Hollow:** Default public access is by parking on the street and walking up the water tank access road from the south, or going into the bottom of Heughes Canyon and bushwhacking south to the water tank road.

**Ferguson Canyon:** Official public access is by parking on the street and walking up the water tank access road. Salt Lake County makes one out of two.

**Deaf Smith Canyon:** Default public access is by parking on the street, by the north mining trail, and following this old trail into the canyon. An attempt was made by local landowners a few years ago to completely block the canyon, but they backed off a few months later. Time out because somebody can't get the ball in bounds.

**Bells Canyon:** Public access was frustrated until a recent deal by Sandy City with The Boulders development. Access will be from Wasatch Boulevard, up through the development, and up the drainage to the empty reservoir. Sandy City misses the front end of a one-and-one, but gets its own rebound.

**North and Middle Dry Canyons:** 20-second time out to note that North Dry Canyon is small and dry, Middle and

South Dry Canyons have year-round streams. The lower part of this area is private property; strictly no Trespassing. Sandy City Parks and Recreation is confident of obtaining an easement for the Bonneville Shoreline Trail across this area, up to the old lower Bells reservoir, and on over to Highway 209 in Little Cottonwood Canyon. It may take several months of negotiating, recruiting, and construction.

**South Dry Canyon:** Too encumbered by private property and recently the site of a new road and water tank where the hiking trail used to be. An alternate trail exists on the north side of the canyon, but it has no official access and is mostly on private property.

**Rocky Mouth Canyon:** Official access is from a little parking area on Wasatch Boulevard, across from the Mormon church, at about 10800 South. The steps lead to a sidewalk that leads past some large houses to another large house where the trail access and water tank maintenance parking lot should have been. North of this house a steep, little, fenced lane is the official access trail. The short trail leads to an old mine and a waterfall. Sandy City makes one out of two.

**Big and Little Willow Canyons:** Somehow Sandy City acquired the flat between the canyons, kept it, and is making a nice park. Hidden Valley Park will have a parking area, a picnic plaza, a paved loop trail, and access to Big Willow Canyon and the Bonneville Shoreline Trail (which provides access to Little Willow Canyon); there may even be a horse trailer area. Both canyons contain drinking water intakes that should be avoided or respected. The longer Big Willow trail is accessible from the Big Willow water road by turning right (south) at the mouth of the canyon. Sandy City completes a rare 4-point play with an assist from the Shoreline Trail Committee.

**Bear & Cherry Canyons:** No hiking trails in these canyons, but they are crossed by the Bonneville Shoreline Trail that has a completed segment from Big Willow to Corner Canyon. Just north of Bear Canyon is a horse/hiker trail (Trail of the Eagle) heading east. The Shoreline Trail Committee makes a 2-pointer.

So What? It's slow, but it's progress.

**MAY 13 SAT**
**DAY HIKE: LITTLE BLACK MOUNTAIN (MOD 6.1)**  
**Little Black Mountain from Dry Creek - Exploratory [2/20]**

Jan Uhlir (355-0480) leads the second of his 20 hike series. Little Black Mountain is the high point (8040 feet) on the ridge forming the south side of City Creek Canyon. Jan will lead from the Dry Creek starting point near the University Medical Center, but will first assemble at the Skyline High parking lot. Plan to depart from Skyline at 9:00 a.m. because this hike is about 4¼ miles one way, with an elevation change of about 3100 feet. The last half mile is a narrow, limestone ridge, requiring some scrambling. Hiking time up will be about 3½ hours; coming down might be faster, but Jan will be asking every one to use proper caution. Call Jan for further information concerning this or any of the other hikes in his personal series.

**MAY 14 SUN****DAY HIKE: VAN COTT PEAK (NTD 3.1)**

Join Jan Uhlir (355-0480) for the third in his series of twenty hikes. Today's hike is a repeat of Jan's May 6 hike described above; a second chance for those who missed out the first time. Jan will repeat each of ten different hikes to Wasatch Peaks this season. Meet Jan at the trail head (about 5700 South on Wasatch Boulevard) in time to sign in for a 9:00 a.m. departure. Like last time, the hike is 3 miles each way, with a 4050

feet elevation gain on the way up. Plan on 7 hours for the round trip. Call Jan for further information concerning this or any of the other hikes in his personal series.

**MAY 14 SUN**  
**DAY HIKE: THE PIG (PFEIFFERHORN INCLUDING GLISSADING) (MSD 9.8)**

"The PIG" is Tom's traditional day of hiking and snowfoolery in the consolidated snow. The plan is to hike up Red Pine Canyon, go to the upper lake, and mount the ridge leading to the top. If snow conditions are ok, we will go for the 11,326' summit. Whether or not we summit, glissading games will take place. Contests will be held for the best glissade, the longest glissade, and for Ms. Congeniality. The highlight of the games will be the award of the traveling trophy and the beloved, revered, little, pink Pig. There will be exposure, scrambling, and the need for ice axe experience. Plan to bring the 10 E's, and snow resistant glissading pants. Call Tom at 969-5842 to register.

**MAY 14 SUN**

**TURTLE HIKE: GRANDEUR PEAK FROM CHURCH FORK (MOD-5.4)**

Nancy Phillips (942-8953) will meet you at the Skyline High parking lot at 9:00 a.m. and proceed at a comfortable pace. The idea is to enjoy the scenery and the company. Although this hike is normally listed as a MOD, Nancy and her turtles will take it slow and easy, as in "NTD." It is only one mile and 880 feet elevation change to the bottom of the switchbacks. Another 1¾ miles, and another 1740 feet up, and you are at the summit. A saddle at the top of the switchbacks, about 2 miles into the hike, is a logical stopping place if time gets short, or for those who want a less strenuous outing. The saddle offers an outstanding view of Salt Lake Valley and is 680 feet lower than the summit.

**MAY 14 SUN**

Randy must return home Saturday, ending the club activity, but others may choose to prolong their stay on their own.

**MAY 20 SAT****TURTLE HIKE: PORTER FORK (MOD-6.0)****Porter Fork in Millcreek Canyon**

Meet at 9:00 a.m. at the Skyline High parking lot. Joan Proctor (474-0275; [joanptch@aol.com](mailto:joanptch@aol.com)) will lead a slow and easy hike, converting this nominally MOD hike into an NTD. The route begins as a road through a summer cabin area. An elevation gain of 1200 feet over 1½ miles brings you to the end of the road. Another 1¾ miles through the Mount Olympus Wilderness Area, with an elevation gain of another 2520 feet, would get the group to Porter Fork Pass. Joan says: "We will continue up toward the pass as far as the hikers care to go, at a slow and steady pace. We are not committed to any particular destination, only the one we choose."

**MAY 20 SAT****DAY HIKE (MOD +7.6)****Kessler Peak- Carbonate Pass Route possibly, North Route Back [4/20]**

It offers views of Flagstaff, Mount Superior, Dromedary, Twin Peaks and Gobblers Knob. Jan will be happy to point these landmarks out to those who aren't quite sure. The Carbonate Pass route is about 3 miles long, and the North Route is about 2¼ miles. In either case, the elevation change is about 2950 feet. Plan on five to six hours hiking time. Bring your ice axe if you have one. Meet Jan at Big Cottonwood Park & Ride in time to get the paperwork done before a 9:00 a.m. departure.

**MAY 20 SAT****DAY HIKE: MOUNT OLYMPUS (MOD 8.9)**

**MAY 20 SAT****DAY HIKE: REYNOLD'S PEAK (MOD 5+)****Reynold's Peak via the Butler Fork Wilderness Trailhead**

Contact Roger Lester (467-9401; mountaineerrog@dellnet.com) to sign up. This hike is Roger's traditional, annual event. If the weather is sour, he may cancel. So far, he's never had to cancel this hike. Snow is expected and people should have sturdy shoes and gaiters. If you want to hike in shorts, it can be cool, and warm gear should be carried. Roger recommends some slick pants for a fast return down the north bowls. This route is about 2¾ miles one way, with an elevation change of about 2300 feet. It is somewhat more demanding in both criteria than the Mill D Trail (4.8); hence the 5+ rating.

**MAY 20-21, SAT-SUN****BOATING: RIVER SAFETY WEEKEND (II+)**

**MAY 27 SAT****DAY HIKE: BOX ELDER PEAK (MSD 10+)****Box Elder Peak- American Fork Canyon [6/20]**

Jan Uhler (355-0480) heads for the fourth of the peaks in his ten peak/twenty hike series for his sixth hike of the season. Meet Jan at Big Cottonwood Park & Ride at 8:00 a.m. to car pool for the ride to the North Fork of American Canyon. Box Elder Peak is situated between Lone Peak and Timpanogos. The summit view is magnificent. The two, traditional routes to this peak require considerable off-trail hiking. Jan will lead a new, relatively easier, shady route to the summit. One way mileage is about 32 miles, the last 1.5 miles are along a scree covered ridge. The elevation gain is about 4000 feet. Call Jan for further information concerning this or any of the other hikes in his personal series.

**MAY 27-28, SAT-SUN****BOATING: RUBY/HORSETHIEF (I)**

Jan Uhler (355-0480) repeats his May 20 hike as hike number seven of his twenty hike series. Kessler Peak is the high point on the north end of the ridge separating Cardiff Fork from Mineral Fork. It offers views of Flagstaff, Mount Superior, Dromedary, Twin Peaks and Gobblers Knob. Jan will be happy to point these landmarks out to those who aren't quite sure. The Carbonate Pass route is about 3 miles long, and the North Route is about 23 miles. In either case, the elevation change is about 2950 feet. Plan on five to six hours hiking time. Bring your ice axe, if you have one. Meet Jan at Big Cottonwood Park & Ride for a 9:00 a.m. departure. Please be on time so you don't get left behind. Call Jan for further information concerning this or any of the other hikes in his personal series.

**MAY 28 SUN****DAY HIKE: THE BEATOUT (MSD-15.6)**

Walter Haas (534-1262; haas@xmission.com.) So, did I hear you say that you've always wanted to do the granddaddy of spring, consolidated-snow hiking and ridge scrambling, the Beatout? Well, kids, today's the

day. This day-long adventure is offered only once a year. The route begins at the White Pine trailhead, goes by the Red Pine lakes, and up to the summit of the Pfeifferhorn. It then continues west along the ridge at the head of Hogum Fork to the summits of Chipman Peak and South Thunder Mountain. From there we descend Bell's Canyon. It's been done in as little as eight hours, but figure that 12 or 13 hours is more likely. You will need to bring an ice axe and know how to use it, perhaps from the class on May 6. You had better be in top physical condition too. An early start and car shuttle are required. Call or e-mail Walt to register. If you haven't done the Beatout before, be prepared to tell Walt what you do to stay in shape, and how well you handle exposed rock scrambling.

##### **DAY HIKE -- GLISSADE: PROVO PEAK (MOD)**

##### **Third Annual Provo Peak Glissade**

If you are interested, contact Pete Mimmack (801-377-2330; [pmimmack@novell.com](mailto:pmimmack@novell.com)) This is the big one, with more vertical sliding (2000') than Broad's Fork Twins (1200') and less hiking (start at 8200' vs. 6200'). To be fair, there is more driving involved, but the scenery on Squaw Peak Rd. is truly spectacular. Access is via unplowed, 4wd road, and that makes scheduling tricky. We want to do this with maximum snow on the slope, but it's impossible to predict two months in advance when the road will melt out. So, Pete will make a list of interested people and call everyone late May / early June. Pete says: "Don't worry too much about scheduling conflicts -this is good enough for me to do twice!"

##### **HIKE/SCRAMBLE: WILDCAT RIDGE (MSD+ +)**

Walter Haas (534-1262, haas@xmission.com) This is it, my hardies. One of the toughest, longest, scrumblyest, rattlesnakeyest hikes in the Wasatch. And people come back year after year. This ridge run is done only once each year, on the longest weekend of the year to take advantage of every second of daylight. At dawn you begin hiking from the Mount Olympus trailhead, summit

Olympus, scramble the killer ridge east to Triangle Peak, then continue to the summit of Mt. Raymond and down Porter Fork. You will need to carry lots of water and enough food to go hard all day. The organizer guarantees that you will encounter at least one rattlesnake, and get to dangle from many rocks without a belay. An early start and car shuttle are required. Call or e-mail Walt to register. If you haven't done Wildcat Ridge before, be prepared to tell Walt what you do to stay in shape, and how well you handle exposed rock scrambling and rattlesnake encounters.

We may need to pay camp fees. The Clear Creek Campground has two creeks running through it, as well as three trails to choose from. Star gazing should be excellent. Randy must return home late Saturday

evening, thus ending the club activity unless a substitute organizer is selected to continue through Sunday. Some may wish to prolong this trip on their own.

##### **BOATING: SPLIT MOUNTAIN (III)**

We will leave early evening on the 23rd for a weekend of fun in Dinosaur National Monument. The water should be great in June for a fast run from Rainbow Park to the take-out at Split Mountain. Participants on this trip should have some boating experience by having at least

the beginner trip in May under their belt or perhaps another river trip or so from years past. The river drops by 80 feet per mile making for a fast and fun run. We will do the river twice, once on Saturday and then again on Sunday. For those that want to train or have information share, we will be talking about paddle raft captaining and water reading during the trip. We will be camping both days at Split Mountain Camp Ground. If you're signing up, call Carol Milliken at (435) 882-4108, a \$50 deposit is required to reserve your space. Call before 9 p.m. in the evening or on weekends. Carol will be out of town until May 6.

##### **PEAK BAGGING IN COLORADO**

Rendezvous in Colorado to do some remote thirteeners in the Maroon Bell wilderness area near Aspen, another wilderness area near Rocky Mountain National Park, and possibly the Sangre de Cristos in the southeastern half of state. Short backpacks are required to get to the bases of some of these peaks. Participants must have prior peak-bagging experience at these altitudes. We'll encounter some third and fourth class scrambling. No novices. The leader, Jane Koernephone (435-750-0051; e-mail janek@media.usu.edu.) promises to also lead the group to good bakeries, hot springs and ethnic restaurants.

#### **SEP 2-20**

##### **ROAD BIKE: CANADA TO MEXICO BIKE TOUR STAGE III**

The second stage last year of the WMC Canada to Mexico (Quiche to Taco) ride was a great success and we will continue this year with the last stage. This will start where we left off last summer near Alamosa, Colorado, and go through Chama, Taos, Santa Fe, Ruidoso, Alamogordo and end this year at El Paso, Texas, with a stop on the return trip at Carlsbad Caverns. Total mileage is around 660. Previous participants will have priority, but there may be some space for new people. There will be a scouting trip in

April. Watch future Ramblers for details of planning meetings and more information. Call Bob Wright (801-209-2392) or the Fishers (435-849-0183) for more information.

#### SPRING 2001

##### MACHU PICCHU & GALAPAGOS

Plan a two week trip to take in both of these once-in-a-lifetime destinations. The basic plan is to spend some time in Cusco Peru, four days hiking the Inca Trail to Machu Picchu (tents, porters, cooks, and gear supplied by a local guide service,) plus 6-7 days cruising in the Galapagos with a full-time naturalist guide. Our own boat is possible if we have at least 10 people. If there is interest in tacking on a visit to Manu Rainforest (4.5 million acres, 20,000 plant species, 1,000 bird species,) that is a possibility. Projected cost is in the range of \$3,000. If interested, call Dudley McIlhenny at 801-733-7749 for more information.

## Membership Director Message:

### What is the Salt Lake Foundation?

Several people have asked about the Salt Lake Foundation, wanting to know exactly what it is and what its relationship with the Wasatch Mountain Club is. In essence, the SL Foundation is a non-profit organization loosely affiliated with the Club, that allows members to contribute funds as a charitable donation.

Because the Wasatch Mountain Club is not a non-profit organization, any contributions made to the WMC are not tax-deductible. So, for instance, if you wanted to support the WMC's conservation activities, you could not give money directly to the WMC and claim a charitable deduction. But you can give money to the SL Foundation to use as they see fit (typically for conservation causes) and count it as a charitable contribution. That's the short of it.

We thank those who support the Foundation. Consider a donation when you renew; there's a space right on the renewal form.

## Hiking Director Message:

OOPS!! There were some printing errors in the April "message." I (and the editor) apologize for misspelled names, telephone numbers and e-mail addresses. For the record, the following members have agreed to serve as hiking coordinators, and have been doing a super job:

Don't be bashful about contacting any of the coordinators. They are scheduling many events each month, and can use your support. You can contact the hiking director, Dave Trask, at any time by **e-mail: [dvt@diviti.com](mailto:dvt@diviti.com) or phone (273-0090.)**

The committee has relied to a great extent upon e-mail communications. An e-mail message can be sent to hundreds of our members in an instant, at any time, day or night. The response to an initial e-mail cry for help has been gratifying. Nevertheless, we still need to reach out to those of our members who continue to survive outside of cyberspace. Telephone communications require one-on-one contacts during reasonable hours, and your committee would appreciate some volunteers to make those calls. Our greatest need at this point is organizers for weekend hikes, especially of NTD and MOD rating, for the months of July through September.

Thanks to all of you who have served or committed to serve as organizers this season. A special thanks to those who are organizing MSD and MOD+ events. The developing schedule has a good mixture of "exploratory" and "traditional" trips. They are well thought out, interesting and certainly worth the effort. Look over *The Rambler* listings, choose an event within your comfort level and contact the organizer for inclusion in a special experience.

## Boating Director Message:

**BOATERS:**

A boating e-mail was sent on April 15 to all boaters for whom I have an e-mail address. If you did not receive this e-mail please contact me at [bartholoma@netscape.com](mailto:bartholoma@netscape.com) or 801-277-4093. All important information for boaters is sent to this list. Thanks. Bart.

**Trip Talks:****Fool Peak****April 1, 2000****by Tom Walsh**

What's the best way to observe April Fool's Day? There is only one way – climb Fool Peak. Long time club member Charles Leslie noted the fortuitous existence of Fool Peak whilst browsing a topo map. In a flash of intuition he realized that an early season hike up Fool Peak on April's Fools Day is an unbeatable stunt. Let the schoolkids make prank phone calls asking grocers if they have Prince Albert in a can. Us big kids will start the hiking season the Mountain Club way!

In 1996 on the second to last time on Fool Peak, the snow was deep and very soft. Every step went to mid-thigh or deeper. Learning from that miserable experience, snowshoes were required equipment. In 1998 there was a strong and cold wind blowing from the north. Learning from that, it was required that participants be prepared to play tunes on a kazoo. Admittedly there is no connection between wind and kazoos, but on April Fools Day anything goes.

Our car pool got to Oak City about 9:15. One of the three roads going out of town went east toward the Canyon Mountains. About 4 miles in, the gravel road was blocked by a Forest Service gate. Well OK, we just began the hike at that point nearby the Oak Creek Ranger Station. We passed by Lime Kiln Canyon and continued on to North Walker Canyon which is the trailhead for the hike.

In 1998 the trail was severely ripped up by 4WD tracks. This year it was recovered somewhat, but still eroded. The route went north about 3 miles and gradually tapered from a road to a trail on the valley bottom where we crossed a stream half a dozen times. Toward the end of the drainage the trail rose to a ridge at the end of the canyon. From that ridge we turned right, which was east and for the first time were able to see Fool Peak. At this point we had gained 1700 feet, which is a tad over half of the total elevation.

With the easy part behind us, the climb to the summit required climbing 1617 feet in about a mile. This is about the same steepness as the west face of Grandeur. We never did deploy our snowshoes because snow was mostly firm. The only places where snowshoes would have been useful were those occasional shady tree wells where we bogged down due to Leslie's route.

Fool Peak is shaped somewhat like Notch Peak, with a cliff of about 1700 on the east side, and a rounded smooth face on the other. The snow cornice on the summit was rounded and slick. It inspired caution to say the least. We couldn't get close enough to look over the edge. Barb and Leslie only stayed on the summit a few minutes. Accordingly the responsibility to play a few kazoo tunes on the Fool Peak summit fell to Cheryl and me. We did the job right, then left and scooted down to get warm.

Back in Oak City we saw a local guy cruising in his flatbed truck. His dog was on top of the roof of the cab, with all four feet planted sure-footedly and standing tall above the traffic. Somehow this seemed like a suitable closure for a Fool Peak Hike. Participants included Cheryl Soshnik, Leslie Woods, Barbara Hanson and organizer Tom Walsh.

**Bountiful Peak Snowshoe**

**By Leslie Woods**

What an incredible day for a snowshoe up to Bountiful Peak! An early meeting time, outside the Tri-Canyon area, blue sky, sunshine, cool temperatures and minimal trail breaking. Seven enthusiastic souls met at the Centerville Albertson's to join Burt, regroup and begin up the trail of untracked snow. Three of the amigo's made it to the top, while the others found the ideal lunch spot with a view and sunshine. It was amazing that the wind was not really howling on the peak, since it is known for having gusts of up to 130 mph. After taking in the views and enjoying the day, we headed back down to the trailhead. Participants included: Burt Balzar, Monty Young, Fred Gabriel, Cassie Badowsky, Cathy Hunn, Judy Elizondo and Leslie Woods.

**Thomas Fork of Neffs Canyon**

**By Perry Pederson**

Those in attendance: Allen Olsen and Ilka Olsen (our gracious guides), Bob Stringham, Dave Trask, Leslie Woods, Vince Desimone, Eric Biedermann, Cathy Hunn, Cassie Badowsky, Perry Pederson, Russell Patterson, Irene Dean, and Dave Morris. However, for some reason when we counted noses we came up with 14 instead of 13.

Now I know what MSD stands for. My first outing with the WMC was to Dog Lake (NTD) and on to Reynolds Peak (MOD.) So I thought, how bad could it get? By the time I got down off the mountain I had decided to skip my afternoon trip to the gym. I figured that if climbing Thomas Fork of Neffs Canyon does not count as a workout I would rededicate myself to a sedentary lifestyle.

The climb was arduous but we took time to stop and smell the roses (it takes a good nose to smell flowers under a couple feet of snow.) Sometimes I just put my head down and climb but I am learning to appreciate the accent as much as the reaching the peak. The Thomas Fork certainly provided ample opportunity to appreciate the grandeur of the Wasatch mountain range and an incredible view of the Salt Lake Valley.

When we reached the peak it was time for a leisurely lunch while an incredible panorama spread out around us. The sun shown through high thin clouds and provided enough warmth for most to wear simply a tee shirt while dining at our destination.

The trek down the mountain certainly went a little faster than the ascent and I learned the value of shorter snowshoes. I spent a fair amount of time on my knees up to my waist in powder (much to the amusement of those around me) and Cassie had to help me get out of a hole once. We had a lot of fun on the trip down and Ilka, Vince, and Irene

demonstrated their snowshoeing prowess by skiing down a haystack. Skiing with snowshoes...now there is an idea for an extreme sport.

When I finally reached the dirt trail at the bottom of the canyon I was glad to be down but saddened by bringing such an incredible experience to an end. But then, there is always tomorrow.
